Art Unit: 1614

Claims 8-10 and 15-21 are presented for examination.

Claims 22-26 are withdrawn from examination. Such claims are directed to a subject matter which was not presented originally.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8-10 and 15-21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claimed invention is directed to the phrase "one or more non-peptide neurotrophic factor stimulator". The specification discloses examples of structures of some compounds within the scope of what is claimed. However, there is no evidence that there is any per se structure/function relationship between the disclosed neurotrophic factor stimulator compounds and any others that might be found using the claimed method. Structural identifying characteristics of group of neurotrophic stimulators are not disclosed. Therefore, the claimed invention is not supported by an adequate written description.
